

TELETASK

trendsetter in domotics

ACCESS CONTROL

Comfortable access with real-time app overview on your smartphone or tablet

Everybody puts security first. Our house is our home and we all want to be sure that only those we trust can enter. With the TELETASK Proximity Readers all this is guaranteed. TELETASK offers security with an extra: the integration with home automation and a (free of charge) real-time visualisation app.

Security

A uniquely encrypted card gives access to your home. So, there is no risk of having your card copied, like with a traditional key or (wireless) access card. Neither there is a simple electric contact which can be sabotaged. Although simple in use, the TELETASK Proximity Reader is one of the most robust and highly secured readers available on the market.

Integration

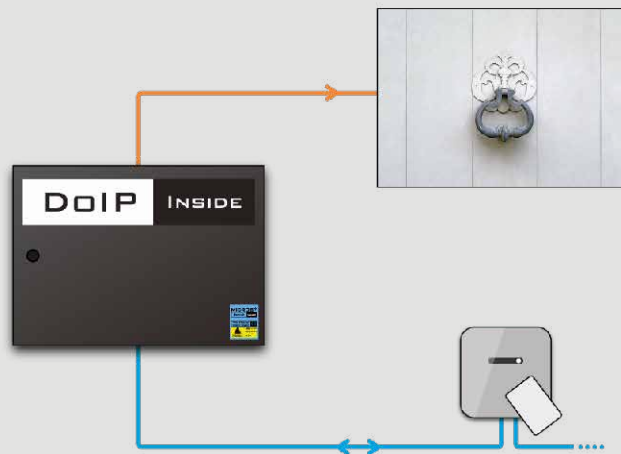

Thanks to the system's high level of integration, opening your door can influence all kinds of other home automation functions: change

temperature settings, activate the water supply valve, control the lights, etc. ... Your personal range of functionalities will automatically be activated.

Every card is individually encrypted and allows the appropriate level of access and control over your home or building. Just imagine the cleaning person entering while you are absent. The individual access card may only allow access on predefined days and hours. Or take for example the gardener: his card can only open the gate and the garden shed but not the private doors of the house. He will have access to tap water and electricity for the time he is supposed to be there. Your TELETASK system will take care. You don't even have to think about it.

The PORTA app

The PORTA app comes free of charge with your TELETASK Card Reader(s). All access events are logged in real time. At any time you can check the given and denied access events on your smartphone, tablet and pc. The PORTA app gives you all the necessary information in a simple and most

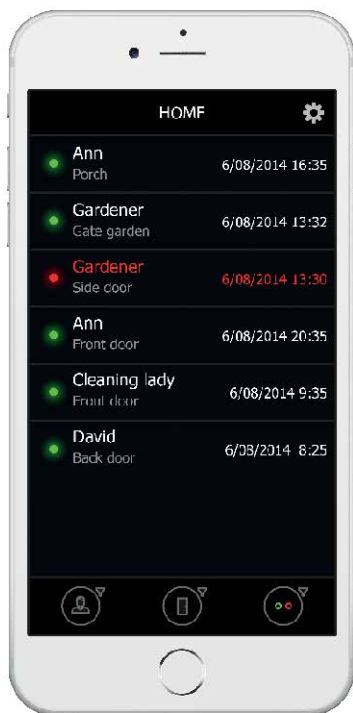

2

- Opens the door
- Switches on the light
- Activates audio
- Activates power supply
- Welcomes you home
- ...

1

Wave proximity card in front of reader to open the door and to activate domotic functions.

Access Control: how to integrate

powerful way. When did the employees arrive, are the kids safe at home, ... etc. You prefer that an access overview is sent to you by e-mail? It's possible with the TELETASK system. Receive your overview history for backup at predefined intervals.

Privacy: For privacy reasons, by default, the family members are not logged by the TELETASK system, but you can activate the access log of individuals when you like.

Important: The local privacy regulations need to be checked by the system integrator to make sure that the individual app configuration complies with them.

Features

- Up to a total of 500 unique cards and tags
- Unique configurable functions for every individual card or tag (also for office applications)
- Every single access (and denied access) is stored and visualised
- System memory (in the central unit): up to 1000 log events are stored on a fifo basis.
- Custom configuration with CARDSOFT (part of PROSOFT; also free of charge)
- Free PORTA app for visualisation on Android, Apple iOS and Windows PC devices
- Possibility to receive an access overview by email at regular intervals

Proximity Reader dimensions:

TDS12142: 115 W x 115 H x 15 D (mm)
 TDS12142GL (same but with glass front plate): 115 W x 115 H x 18 D (mm)

Installation:

On-wall mounting in front of any wall box or hole.

Remark: not to be mounted on a metal surface or close to metal parts (magnetic interference may block the proximity signal).
