TSF16120   **VOICE CONTROL subscription**

Many TELETASK customers like to control their house/building by voice. You can use the TELETASK voice skills in many languages as far as they are available on your smart assistant and can be entered in PROSOFT.

You can use one or more smart assistants in your house/apartment, connected via WiFi to the LAN on which the TDS installation is connected. You only need (a) TELETASK DoIP central unit(s), an internet connection, the Voice Control TSF16120 subscription and some configuration in PROSOFT.

PLATFORM CONDITIONS
- For all DoIP central units which are TTcloud connected.
- PROSOFT V3.7.3 or higher

Available: fully operational since Q1 2020

SETTINGS
Configuration
Via PROSOFT Suite (3.7.3 or higher). Compatible with older PROSOFT versions if configured as TDSxxx.

INSTALLATION
You will need to install the **Amazon** or **Google Home** app on your mobile device first before you can connect your smart assistant(s) with the TELETASK voice skills.

SOME USAGE EXAMPLES
"Alexa,activate bathroom light"

"Alexa, activate diner mood".

"Hey Google, activate wake-up mood".

"Alexa, set bathroom temperature to 21 degrees".

"Hey Google, dim the night hall lights to 30 percent", "close the shades"…. You name it.

COST
The subscription has a limited yearly cost and is automatically renewed every year. The renewal can be stopped in TTcomm at any time and it will stay active until the renewal day.
The system integrator is informed 2 months before the renewal day which of all his subscriptions will be renewed. If the renewal fails because of a non-valid system integrator-credit card, he will be informed immediately to enter a valid credit card.

The TSF16120 subscription can be obtained by the system integrator in **TTcomm** (for professionals only).
