TELETASK
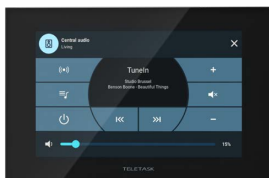

trendsetter in domotics

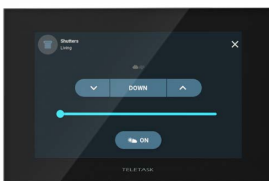

PENTUS
Central management of your basic home control functions

Audio at your fingertips

Motors: blinds, shutters and gates

Temperature control

The PENTUS screen has a menu system of all rooms with their individual and group function controls such as controlling lights, temperatures, curtains, audio, energy management functions etc... PENTUS is to be used in rooms and places where you want to have a central overview of the full home/building and control the integrated functions with a simple touch of your finger.

Due to the many built-in functionalities of PENTUS, it offers clean walls for a better and minimalistic decoration experience.

Thanks to the easy-to-understand menu system, everybody can control his environment without a learning process.

PENTUS has a solid 3mm glass front plate and its slick design allows it to be used in about any room. It is mounted on a standard single wall-box and can be exchanged with all TELETASK AURUS-family members because it uses the universal AURUS mounting
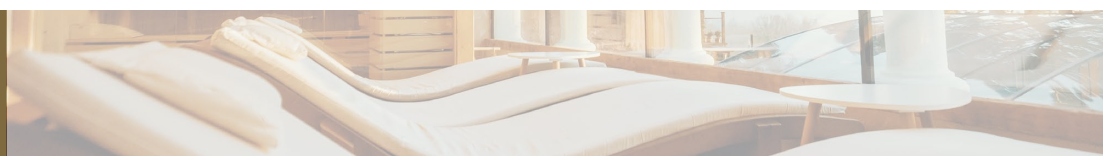

bracket. PENTUS can also be easily found in the darkness of a bedroom, thanks to its built-in LED light (small downlight LED).

PENTUS can also control your (multi-room) audio system. TELETASK supports the most important streaming audio systems of Nuvo, Sonos, Denon Heos, Bose, Bang & Olufsen, Yamaha and others. Contact your TELETASK provider for further details concerning the supported products.

PENTUS will also notify you, by means of the built-in buzzer, for specific messages such as 'don't forget your medicine', 'garage door is still open', 'someone is walking around the house', ...

THE PENTUS USER INTERFACE
The From lighting, shades to music, to climate, energy and security, you can customize every management aspect of your home. Its user-friendly interface

RGB lights control

Tunable White and more...

makes checking and influencing the home functions a breeze. Decades of expertise are combined with the latest UI trends to create an attractive and simple-to-use user interface. You can also put your favourite (most often used) function on the start-up screen. Up to 8 favourites, including lights, wall sockets, moods, shades, curtains, gates, HVAC, audio, sensor read-outs, etc...

Moreover, in stand-by/night mode, the PENTUS deep black screen offers an exclusive appearance. A gentle tap on the screen brings the interface to life for immediate and fast action. No time to waste here!

PENTUS is intuitive and quick to navigate. Try it for yourself!

TECHNICAL
