HOW THE SIMPLUS ROOM POWER MANAGEMENT WORKS:

1. THE DOOR

Door is opened, door sensor is triggered

2. MOTION SENSOR

Motion sensor detects

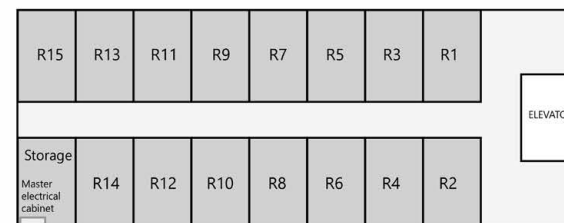

LIGHT MANAGEMENT

15 rooms with only one central unit

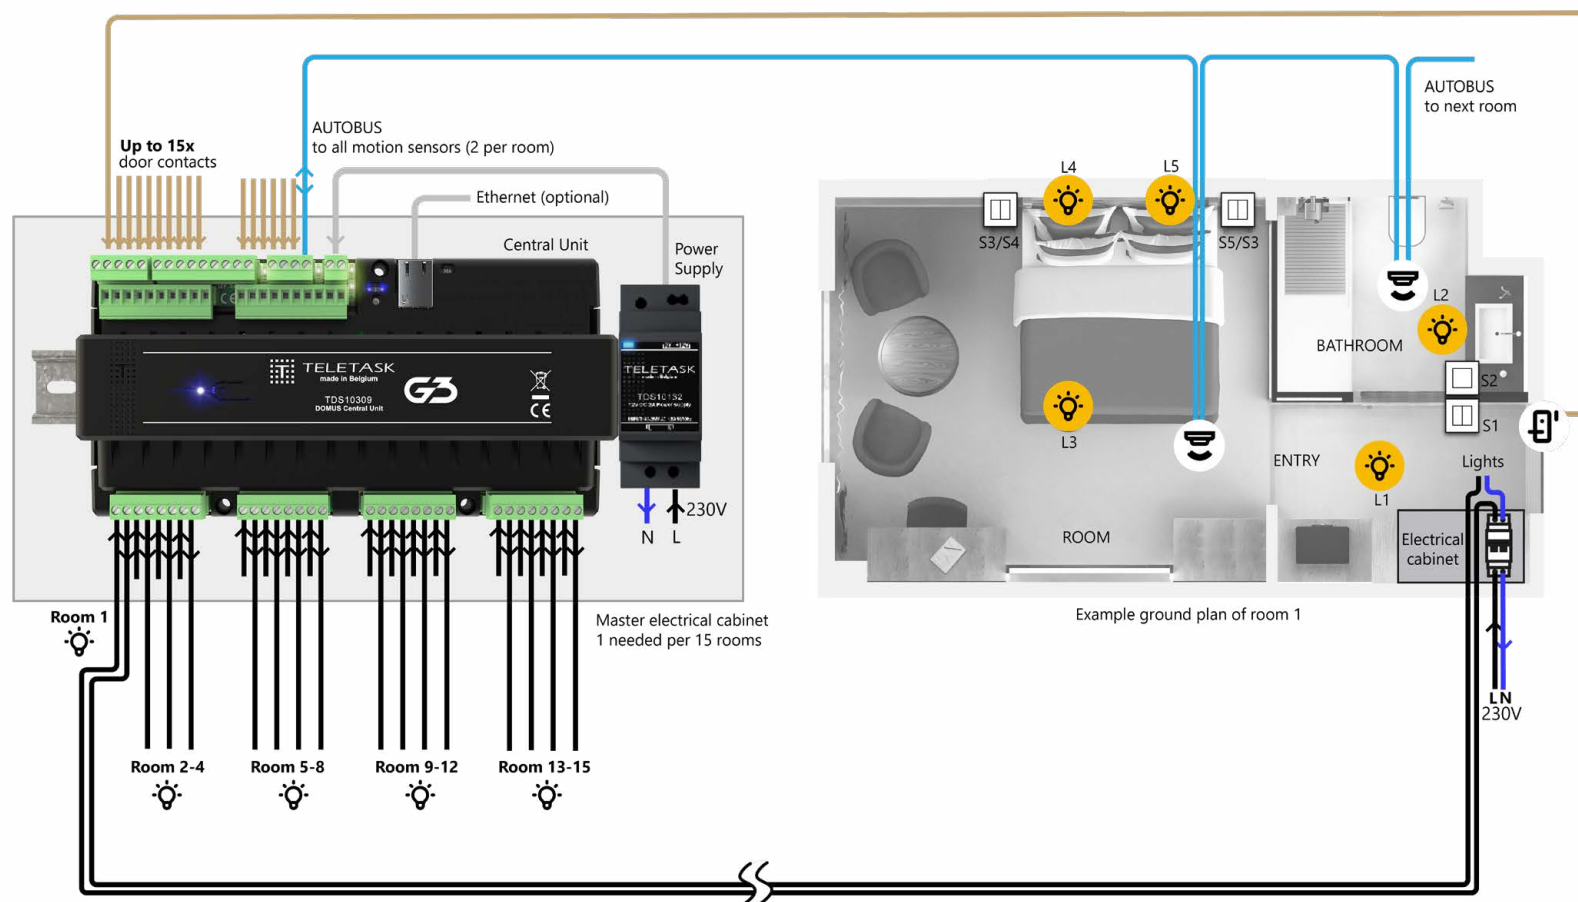

Manage lights with one central unit for 15 rooms, including door contacts and motion sensors.

Extendable.

In this solution, all lights will be automatically powered off when the room isn't occupied anymore.

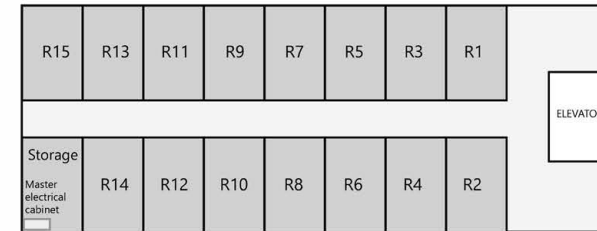

Example floor plan of 15 rooms

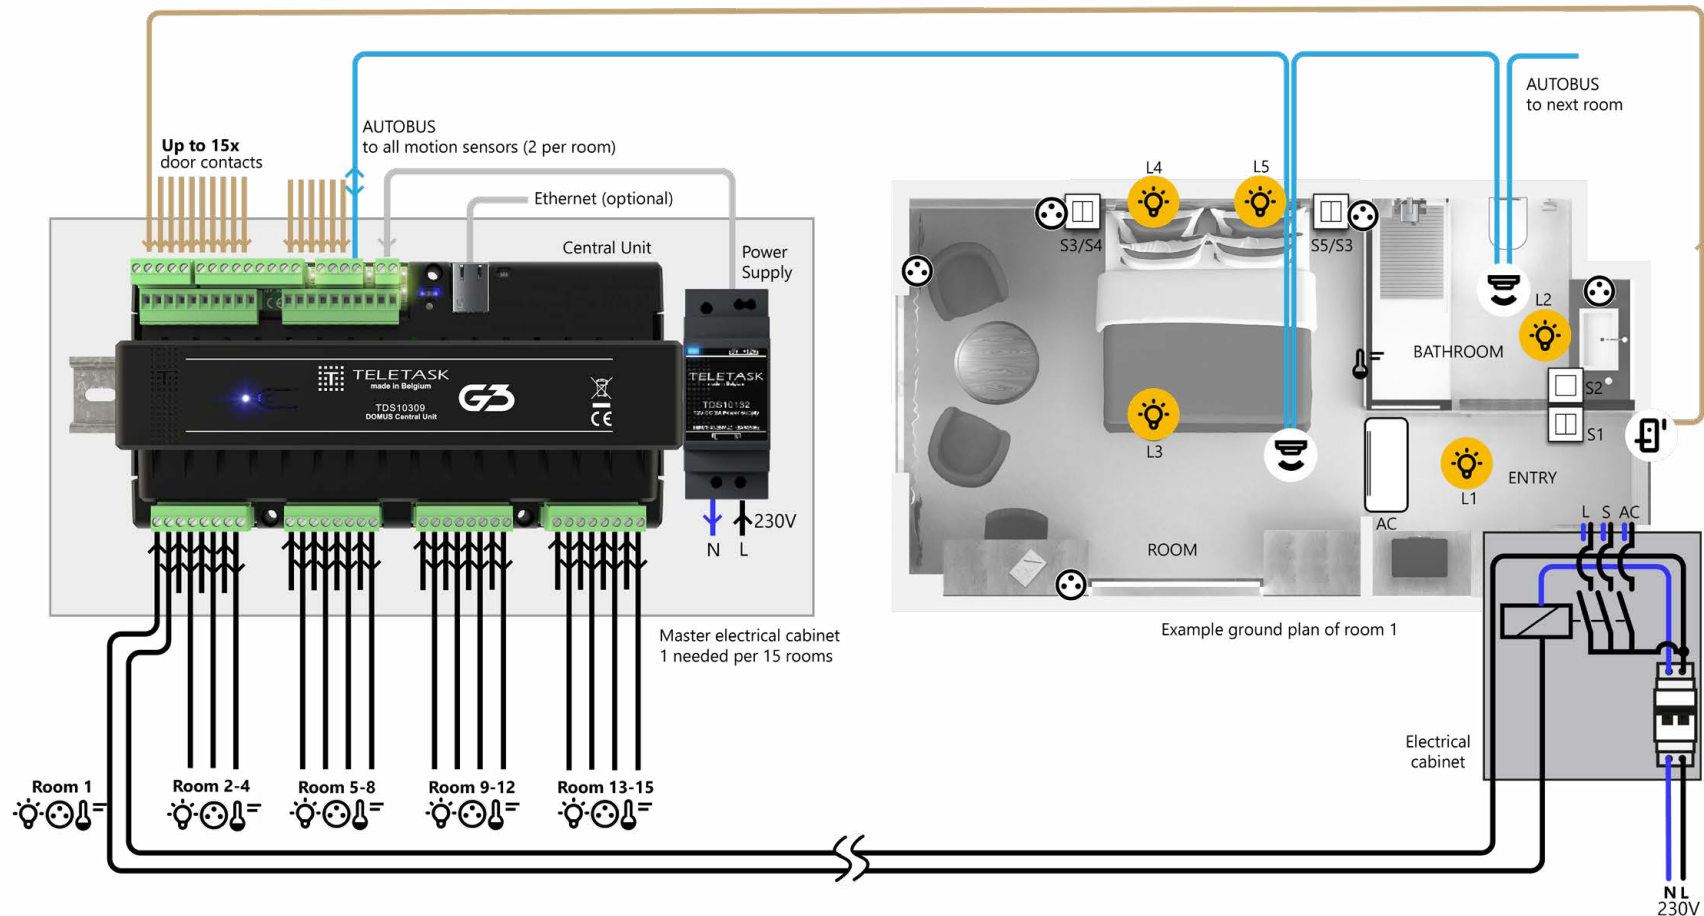

LIGHTS, OUTLETS & HVAC

15 rooms with only one central unit

Manage lights, wall outlets, and HVAC, including door contacts and motion sensors, with one central unit for 15 rooms. This solution is extendable to more rooms when additional interfaces are connected. All lights, wall sockets, and HVAC will be automatically powered off when the room is no longer occupied. This simple yet powerful solution will save the staff time and energy costs.

Example floor plan of 15 rooms
