OUTDOOR VIDEO DOOR PHONE STATIONS PORTUS MINI AND MAX TDS14301/TDS14401

PORTUS MINI and PORTUS MAX are video door phones for access control and door communication, developed for residential and professional applications where reliability, ease of use and refined integration are central. PORTUS MINI is a compact solution, while PORTUS MAX brings together all state-of-the-art capabilities in a distinctly architectural finish.

The PORTUS MINI outdoor unit is a compact and discreet video door entry phone that fits easily into a wide range of façades and settings. The unit can be used both within a TELETASK installation (with OPUS or MAIOR indoor touch screens) but also as a stand-alone solution. In such case, PORTUS MINI can be linked to one or more compatible indoor video door phone units. Multiple PORTUS MINI devices are possible for projects with several entrances.

In addition, the PORTUS MINI features a built-in tag (TDS12208) reader for secure automatic access and night illumination. The supplied rain hood provides extra protection and a refined finish, even in locations exposed to the elements.

The PORTUS MAX is a more comprehensive video door phone within the PORTUS range, designed for high-end residences and professional buildings. This unit combines a refined appearance with video door phone functions and additional features such as local facial recognition, a PIN code keyboard, a tag reader, and QR code access, designed for users with higher design and technical requirements.

In short, the unit is highly flexible for use by residents, visitors and service providers.

In terms of finish, PORTUS MAX aligns with leading architectural ambitions.

PORTUS MINI

The unit is available in four exclusive finishes:

- Alu Black (brushed anodised aluminum)
- Bronze Gold
- Bronze Old (dark)
- Bronze Smoking Gun (charcoal look).

The unit can be installed either surface-mounted or flush-mounted. The connection is made over PoE.

In combination with one or more TELETASK OPUS indoor units, PORTUS MAX can also link door access with home automation functions such as lighting, shades, air conditioning, photovoltaic power, EV charging stations, etc. Via a one-off licence(s), door calls can be forwarded to up to 16 mobile devices (4 per licence).

DIMENSIONS

The PORTUS MINI - TDS14301 is extremely compact and discreet:

- no rain hood mounted: 50W x 130H x 29D (mm)
- with rain hood mounted (supplied with the unit): 55W x 137H x 42D (mm)

PORTUS MAX - TDS14401 is a more impressive unit: 124W x 280H x 45D (mm)
