Subject: **Packaging Compliance Declaration
(PPWR EU 2025/40)**

To: To whom it concerns

TELETASK hereby declares that the packaging used for products placed on the European Union market is designed, selected and managed in accordance with the applicable requirements of **Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR)**.

TELETASK primarily uses packaging based on recyclable cardboard materials. In line with the objectives of the PPWR, packaging is developed with a focus on resource efficiency, waste prevention and recyclability. Packaging solutions are designed to:

- minimize packaging volume and weight while ensuring adequate product protection;
- avoid unnecessary packaging components wherever technically and commercially feasible;
- support efficient collection, sorting and recycling at the end of life;
- comply with applicable legal requirements regarding substances contained in packaging materials.

Packaging dimensions are selected to match the specific size, weight and protection needs of the packaged product. This approach contributes to reducing material consumption, limiting packaging waste and improving transport and logistics efficiency.

TELETASK maintains appropriate technical documentation to demonstrate compliance with the relevant provisions of Regulation (EU) 2025/40. Such documentation is retained and made available to competent authorities upon justified request and in accordance with applicable legal requirements.

This declaration is provided for information purposes and reflects TELETASK's commitment to regulatory compliance, environmental responsibility and the continuous improvement of sustainable packaging practices.
